**COST-EFFECTIVE & EFFICIENT LIMESCALE
PROTECTION FOR COFFEE EQUIPMENT**

The Quick Twist, easy-change system from Scalestop allows you to change the water treatment insert to save time and money as well as reducing single-use plastic waste.

Protect your essential equipment from the harmful effects of limescale with our TAC (Template Assisted Crystallisation) Cartridge system. Hard water passes through the filter micro-beads where the harmful calcium carbonates form into crystals and pass through the equipment rather than sticking and coating surfaces and elements.

The TAC cartridge keeps all the minerals in the water that are important for good coffee extraction and taste.
